(Following Paper ID and Roll No. to be filled in your Answer Book)									
PAPER ID : 121858	Roll No								

B.Tech.

(SEM. VIII) THEORY EXAMINATION 2013-14 ENERGY EFFICIENCY AND CONSERVATION

Time: 3 Hours Total Marks: 100

Note: - Attempt all questions. All questions carry equal marks

- 1. Attempt any two parts of the following: $(10\times2=20)$
 - (a) Discuss the principle of energy conservation. What are the advantages and disadvantages of energy conservation?
 - (b) What do you mean by "Energy Conservation in small scale industries and large scale industries"? Explain in detail.
 - (c) What do you understand by "STRATEGY OF ENERGY AUDIT"? Discuss the aim of energy audit.
- 2. Attempt any two parts of the following: (10×2=20)
 - (a) Write short notes on the following:
 - (i) Energy audit of Electrical systems.
 - (ii) HVAC
 - (b) Discuss the concept and scope of demand side management. What are advantages and disadvantages of demand side management?
 - (c) Write short notes on the following:
 - (i) DSM Strategy
 - (ii) Evolution of Demand Side Management.

- $(10 \times 2 = 20)$ Attempt any two parts of the following:
 - (a) What do you understand by "national and international experiences with DSM"? Explain in detail.
 - (b) What do you understand by "VOLTAGE PROFILES" in power system environments? What are the different methods for improvement of voltage profiles in power system environments?
 - (c) Explain the following:
 - VAR requirements and Power factor
 - Voltage drop calculations.
- $(10 \times 2 = 20)$ Attempt any two parts of the following:
 - Discuss the working principle and equivalent circuit of VAR control devices in power system networks. What are the features followed by VAR control devices in power system networks?
 - Explain the following:
 - Capacitors units and bank rating
 - Protection of capacitors and switching.
 - What do you mean by "Voltage Instability" in power system networks? What are the various causes of voltage instability in power system networks? How it is improved in power system networks?
- Attempt any two parts of the following: $(10 \times 2 = 20)$
 - (a) What do you mean by "Energy efficient motors"? What are the special features associated with such motors?

2

- Write short notes on the following:
 - Energy efficient windows
 - Distribution Code and Electricity Bill 2003.

3

- Explain the following:
 - Load scheduling/shifting
 - Day lighting timers
 - Indian Electricity Act 1956
 - (iv) UPS Selection.
